TT136

T130P / selection reference

TT126

TAP TO EXPLORE

Confirmed products and model comparison	02-03
Choose by tourism scenario	04-06
WTM, travel, hotels and planning tools	06-08
European guiding essentials	09
Official sources and support	10

Only the confirmed exhibition list is available for hands-on experience. T130P/T131P and T130U/T131U are selection references; other arrangements are subject to the on-site meeting.

3-5 NOVEMBER 2026 | EXCEL LONDON

Compact English edition · Information checked 17 October 2026

retekess.com | support@retekess.com

The confirmed exhibition highlights

Compare the use case, then test the working details at S18-202.

TT136 / Multilingual communication

Best for: multilingual tours and international visitors.

Features: AI translation in up to 120 supported languages, with single/dual-language broadcast; up to **2 target languages simultaneously** under the current FAQ. Original-audio guiding works offline.

Plan: translation needs Wi-Fi/hotspot and credits. Trial the actual language pair, accents and network before deployment.

TT126 / TT126R / Interactive touring

Best for: guide collaboration and tours needing return speech.

Features: two-way communication, automatic pairing, one-touch mute and adjustable microphone gain.

Configure by role: specify which guide/participant units must speak. The **TT126E ear-hook option is listen-only** and is not on the confirmed exhibition list. The show list names TT126/TT126R; confirm the demonstrated receiver mix at the stand.

TGS-50 / Multiple groups

Published: up to 70 simultaneous groups, noise cancellation, OLED display.

Use case: compare for parallel departures and busy tour sites.

At the stand: test nearby groups and confirm regional frequencies, channel planning, runtime and pairing workflow.

TGS-100 / Long shifts

Published: receiver runtime up to 100 hours; one-touch counting and power on/off.

Use case: compare for long tours and daily fleet handling.

At the stand: confirm transmitter runtime separately, what the counting function counts, battery conditions and charging setup.

TGS-60 / Audio playback

Published: interpretation-audio playback, automatic triggering and manual playback.

Use case: compare for attraction and museum audio experiences.

At the stand: confirm trigger method, content loading, available languages, required accessories and the manual override.

Rental / charging cabinet

ON SITE

Explore a complete handover and return cycle. Confirm device compatibility, charging capacity, power requirements and any rental-management functions on the actual cabinet. No bay count or software capability is promised here.

Try a real introduction, a question and the wearing fit. Confirm language/network needs, receiver roles and charging workflow. Published values depend on version and conditions; the rest of the confirmed list follows on page 3.

More demos and a clear model comparison

Only selected products are introduced here. For more, explore [Tour Guide System](#) or [contact us](#).

More confirmed products to try

Model / group	Why compare it
TT134	AA batteries; transmitter noise reduction. Confirm battery and charging rules.
TT116S	App connection, dual-presenter commentary, 2.4-inch touch control. Confirm app workflow.
TT135	Noise reduction, Bluetooth and silicone ear hooks. Test the wearing fit.
TT133	Touchscreen control, DSP noise reduction, TF recording/playback.
TT116	Replaceable batteries; AUX and MIC input together.
TT127	Live speech + stored audio; dual-guide workflow.
TT128	Independent preloaded audio; prepare your own approved language content.
TT129	Three-transmitter operation; confirm roles and switching on the demonstration kit.
TT106S	Lightweight ear-hook listening and one-button mute; not compatible with TT106.
TD112 / TD113	Staff/service-call watch receivers; not visitor commentary receivers. Companion equipment must be confirmed.
TA003 / TA004	Silent-audio transmitter/headphones; three separate streams with three transmitters.
Retekeess 1-to-4 set	Listed demonstration set. Exact model, speaking roles and included units: confirm at the stand.

Selected tourism products: compare the function

Product	Function / distinction	Demo status
T130P / T131P	One-way DSP speech; separate earpieces.	Reference
T130U / T131U	Digital audio; MIC / AUX / Bluetooth inputs.	Reference
TT106S	Ear-hook listening; lightweight receiver.	On-site
TT126	Two-way roles; check the exact receiver mix.	On-site
TT129	Up to 3 simultaneous full-duplex speakers, using corresponding transmitter units.	On-site
TT127	Live speech + stored audio; guide-led.	On-site
TT128	Preloaded audio; independent visits.	On-site
TT133	Touchscreen / playback; not automatic translation.	On-site
TT136	Online AI translation, with network and credits.	On-site

Reference: selection only, with no on-site demo promise. Only the lists on pages 2-3 are confirmed; all other arrangements are subject to the on-site meeting.

[Walking / city tours 04](#) · [Cycling routes 04](#) · [Museums / attractions 05](#) · [Coach / multilingual 06](#) · [Independent visits 05](#)

Walking and cycling: two clear choices

A comfortable voice for every guest

Start with the listening style, then add interaction only when needed.

Need / product	Selection logic
Simple live commentary T130P / T131P Reference	One-way DSP audio. Compare wired-earpiece comfort and regional version.
Lightweight ear-hook TT106S On-site	About 18g receiver; check fit and left/right options. Not compatible with TT106.
Questions / guide teamwork TT126 On-site	Choose units that support return speech. TT126E is listen-only.

A simple starting recommendation

For a standard city walk, compare the T130P/T131P wearing style with TT106S. Choose TT126 when return speech is part of the tour. For many parallel groups, discuss TGS-50; for long operating shifts, compare TGS-100.

20h / 36h T130P transmitter / T131P receiver · **23h / 50h** TT106S transmitter / receiver · **18g** TT106S receiver, approximately

Reference kit / 20 visitors

1 active guide transmitter + 20 matching visitor units + 2 spare visitor units, compatible microphone/earpieces and enough charging capacity. This is a planning example, not a retail bundle.

Before departure: test corners, crowds and the longest group separation; confirm local radio requirements. Keep explanations away from doorways and crossings, and mute private conversations. Published runtimes are manufacturer values, not route guarantees.

T130P / T131P

TT106S

TT126 / TT126R

T130P / T131P

T130U / T131U

TT116

Make the stop part of the experience

Prioritise stopped briefings; a headset capability does not override road law.

Need / product	What to evaluate
One-way DSP speech T130P / T131P Reference	Wind protection, attachment and comfortable listening at stops.
Digital / external audio T130U / T131U Reference	MIC, AUX and Bluetooth inputs; check actual source connections.
Field battery changes TT116 On-site	Exact AA type, replacement process and charging instructions.

Five-country riding filter

France and Spain: audio earphones connected to a receiver/player are prohibited while cycling; use audio after stopping safely.

Italy: headphones are prohibited in motion; limited hands-free/earpiece exceptions require hearing in both ears and no hand use.

Germany: devices must not impair hearing/vision; handheld restrictions apply.

UK: maintain safe control and awareness; no blanket headset ban is claimed here.

Kit example: 1 transmitter + 12 matching receivers + 2 spares, secure fixing and a protected microphone. Test helmet fit and keep safety instructions audible. Lead/tail return communication requires separately validated two-way units. Never recharge non-rechargeable batteries.

Segway and other powered transporters have separate vehicle rules. UK public-road/pavement use is generally not lawful under ordinary conditions; authorised private-land use is a different case. Complex vehicle exceptions and exact road-law scope: open the cited official sources.

Indoor and self-guided visits

Start with permission, then the audio

Match live speech, external audio or stored recordings to the actual visit.

Need / product	Reason to choose
Live speech only T130P / T131P Reference	One-way DSP speech and individual earpieces.
Live + external audio T130U / T131U Reference	MIC / AUX / Bluetooth input choices.
Live + stored recordings TT127 On-site	Guide-controlled playback with live explanation; dual-guide workflow.
Triggered attraction audio TGS-60 On-site	Compare automatic triggering and manual playback; confirm trigger method on site.

Use these three filters in order

- 1. Permission:** confirm guiding rights and the specific audio equipment accepted.
- 2. Route:** test stairs, walls, corners and movement between galleries.
- 3. Content:** choose TT127 for guide-led recorded inserts; evaluate TGS-60 for the demonstrated trigger workflow. Independent exploration follows a different path on page 5.

Venue rules can determine the kit

Vatican Museums require their own radio service for specified groups and prohibit other radio systems. The National Gallery prohibits amplification devices; personal receivers are not an automatic exception. Arrange venue acceptance before bringing your own equipment.

15-visitor example: 1 active TT127 transmitter + 15 matching receivers + 2 spares, approved earpieces and charging. If two guides must speak, confirm the supported dual-guide setup rather than assuming a second transmitter works simultaneously.

TT127

TGS-60

T130U / T131U

Let visitors explore at their own pace

Prepare the content first; then decide who controls playback.

Need / product	Decision point
Visitor chooses preloaded audio TT128 / On-site	Independent listening. Prepare approved audio for each stop/language.
Guide leads the group TT127 / On-site	Guide controls stored audio and adds live explanation.
Automatic / manual triggering TGS-60 / On-site	Test the actual trigger and manual override; do not assume GPS/RFID or AI translation.

Four things to prepare before deployment

Route: number each stop and keep labels consistent.

Languages: commission or approve narration and translations; a language menu does not create the content.

Files: confirm format, naming, loading and playback on the actual devices.

Rights and upkeep: clear audio/music rights and keep a version record.

Size by concurrent use

For 30 independent visitors at one time, plan around 30 TT128 units + 3 spares. Add capacity when cleaning/charging prevents immediate reuse. Daily attendance alone does not determine the fleet size.

TT128 has 16GB storage and a 41-language option structure on the product page; this is not a promise that your venue commentary is included in 41 languages. Confirm content and storage requirements with the team.

TT128

TT127

TGS-60

Build the kit. Plan the meeting.

Decide who creates the translation

Translation, transmission and coach connections are separate decisions.

Need / product	What it actually does
Original speech TT133 On-site T130P / T131P Reference	Transmits the spoken audio. TT133 adds touch control and recording/playback.
Human interpretation Interpreter + a validated feed for each language	The interpreter creates the translation; ordinary guide receivers do not translate it.
AI translation TT136 On-site	Needs network and credits; test actual language pair and current simultaneous outputs.

Coach audio is a connection question

Do not assume a transmitter connects directly to the coach PA. Confirm the connector, signal level, microphone priority and operator approval. Plan the off-coach walking section with matching personal receivers.

Send six answers for a tailored configuration

1. Countries, route and venues.
2. Maximum simultaneous visitors and departures per day.
3. Guides and speaking/return-speech roles.
4. Original speech, human/AI translation or recordings.
5. Tour length and charging turnaround.
6. Wearing/accessibility needs and existing equipment.

Compatibility: choose matched model families, earpieces and chargers. An identical connector or similar appearance does not prove compatibility. Configuration quantities in this guide are planning examples.

Book now: free, dedicated one-to-one support

Alongside this PDF, a booked meeting gives you:

Before WTM: access to **55 free tickets**, first come, first served. Our team provides the claim link and invitation code, plus pre-meeting visa application assistance.

At WTM: tailored demos, guidance and one-to-one selection advice; a **white canvas bag + black coin purse (30 sets, first come, first served)**.

Complimentary products: visitors who have in-depth meetings with our team at the exhibition can receive a complimentary product. **Limited to three recipients.**

[Book a meeting / leave your questions](#) | Ask in the form or email support@retekess.com for dedicated guidance.

Your visit, made easier

Bring your route and your questions. We will help you compare the right options.

3-5 NOV 2026 / Tuesday to Thursday · **S18-202** Retekeess stand · **GMT** London local time

Date	Show hours
Tue 3 November 2026	09:30-18:00
Wed 4 November 2026	09:30-18:00
Thu 5 November 2026	09:30-17:00

Excel London · Royal Victoria Dock, 1 Western Gateway, London **E16 1XL**, United Kingdom. Search Retekeess in the exhibitor directory and save S18-202 on the official floorplan.

Register and print before arrival

The live WTM FAQ lists visitor tickets at **GBP 79 through 2 November**, then **GBP 99 for 3-5 November**. Approved Buyers attend free. Register each attendee using a unique email and the correct category; checkout conditions control.

Before you leave the hotel

Print your badge: WTM states no onsite badge printing. Keep meeting details, photo ID and the stand location handy. The Retekeess enquiry form gives access to this guide; it does not register a WTM ticket.

A useful hands-on meeting

Try speech clarity, wearing fit, pairing/mute and handover. For translation, bring a short sample in your actual language; for rental, discuss group turnover and charging. The confirmed demo range is only the list on pages 2 and 3.

Arrive smoothly and choose a nearby base

Origin	Practical approach
United Kingdom	Domestic rail to London, then Underground/Elizabeth line or DLR to Excel. A London terminal is not the exhibition venue.
France	Eurostar: Paris Gare du Nord → London St Pancras. Thameslink to Farringdon → Abbey Wood-bound Elizabeth line → Custom House.
Germany	Cologne → Brussels Midi → Eurostar to London, allowing cross-Channel check-in at Brussels; compare flying too.
Italy / Spain	Compare flights to London including luggage and the full airport-to-hotel transfer, rather than airfare alone.

Eurostar Standard/Plus: arrive at St Pancras 75 minutes before departure; gates close 30 minutes before. Paris recommends 75-90 minutes. Route/class exceptions: [T12].

London: three useful connections

Heathrow / central London: Elizabeth line towards **Abbey Wood** → **Custom House** (West Entrance). The Shenfield branch does not serve Custom House.

Jubilee line: Canning Town → Beckton-bound DLR → **Prince Regent**, WTM's recommended East Entrance station.

London City Airport: DLR to Canning Town → Beckton branch → Prince Regent. Tap in/out with the same card or device; phone and physical card cannot be mixed.

Entry: UK and Schengen are separate

Italian, Spanish, French and German passport holders generally need a UK ETA unless exempt by status: **GBP 20 each**, including children. British/Irish passports are exempt. Business visits can include meetings/trade fairs, not direct selling under that permission. Other nationalities may need a visitor visa.

Italy, Spain, France and Germany are in Schengen. Ordinary non-EU short stays are generally **90 days in any 180 across Schengen combined**; passport issued within 10 years and valid at least 3 months after planned departure. This is not the EU-citizen free-movement rule. Residence/visa exceptions and date-specific service disruption are too varied for this page: use the official sources for those cases.

Three hotel examples near Excel

Near Excel	Official address / useful distinction
Novotel London Excel	7 Western Gateway, Royal Victoria Dock, London E16 1AA . Compare a full-service stay near Excel/Custom House.
ibis London Excel Docklands	9 Western Gateway, Royal Victoria Dock, London E16 1AB . A simpler nearby option; compare the final total.
Crowne Plaza London Docklands	Western Gateway, Royal Victoria Dock, London E16 1AL . A Royal Docks business base; check the walk to your entrance.

Hotel examples from official pages; recommendations are editorial, with no rate or availability guarantee.

Stay, schedule and keep the tools handy

Choose the area around your priorities

Royal Docks / Excel: prioritise a short final approach.

Canary Wharf: business dining and Elizabeth line access; use the Abbey Wood branch.

Stratford: compare value; Jubilee → Canning Town → Beckton DLR is a useful route.

Liverpool Street / Farringdon: central meetings plus Elizabeth line. **Paddington:** compare when Heathrow access matters.

One-day reference plan / 3 or 4 November

Time	Suggested plan
09:00-10:00	Arrive with printed badge, pass entry checks; show opens at 09:30. Orient yourself.
10:00-11:00	Retekess S18-202: test the relevant demo units and record configuration questions.
11:00-14:00	Booked meetings, lunch and one agenda session if the actual timing fits.
14:00-close	Supplier/destination meetings, short follow-up at the stand and return journey buffer.

For two days, use day 1 to compare and day 2 to resolve configuration questions. **5 November closes at 17:00.** Consider arrival on 2 November and departure after the show or on 6 November. Before paying, compare taxes, breakfast, refund deadline, accessibility and late check-in.

Conference and official tools

2026 theme: Resilience, rebound & reinvention: the next era of global travel. Announced stages: **WTM Wanderlust Headliner Stage, Trends Stage, Experience Hub and Future Stage.**

Announced features include the **WTM Ministers Summit** with UN Tourism/WTTC and the **ITT Future You Forum**. Headliners include Sir Michael Palin, Andrew Flintham, Gloria Guevara, Patricia Yates and Rob Ransom. Choose a relevant session around your booked meetings.

Session times and the live map

The retrieved agenda still indicated more content to be announced; a verified session-by-session timetable was not available. For exact published times/rooms, open the agenda below. In the directory search Retekeess; on the floorplan locate S18-202, your entrance and chosen stages. Save the latest map for offline reference.

European guiding essentials

Named rules keep their local scope; practical guidance is marked as such.

United Kingdom

England: street loudspeakers cannot advertise business/entertainment at any time, or be used for any purpose **21:00-08:00**, subject to statutory exceptions. Daytime nuisance is actionable. **Wales, Scotland and Northern Ireland:** apply their own council/noise frameworks; do not transfer England-only wording. Keep commentary low and access clear.

Italy / Vatican

Venice: 25 visitors maximum; one guide and children up to two excluded. Guided groups above 10 require headsets, except educational student trips; do not block bridges/ramps. **Florence listed municipal museums:** 25 including guide; Santa Maria Novella above 6 needs earpieces. **Vatican Museums:** groups above 10, up to 20 (schools 30), must use the museum radio service; other radio systems prohibited.

Spain

Barcelona Ciutat Vella: 20 visitors plus guide; no megaphones; use designated stopping points and their group capacities. The city reports extension to 2028. **Alhambra:** general-channel groups with an authorised guide and more than 6 participants need headphones.

France

Noise must not disturb by duration, repetition or intensity, by day or night. **Louvre:** standard leisure groups 7-20 plus guide; booking and eligible speaker required; no presentations in room 711; group visit up to 3h, then leave together.

Germany

Avoidable/unjustified noise significantly disturbing the public can be an offence. **Berlin:** protect **22:00-06:00** and Sundays/holidays; devices can disturb in daytime too. **Berlin State Museums bookable tours:** maximum 25; book at least 2 weeks ahead.

Barcelona stopping capacities: Sant Jaume/Reial 8 groups each; Rei 5; Fossar de les Moreres edges, Born, Santa Maria del Mar facade and Pi 3 each; Sant Felip Neri, Isidre Nonell and Salomó Ben Adret/Manuel Ribé area 2 each; Barceloneta and Palau de la Música/Lluís Millet 1 each.

Special-group exemptions, professional guiding rights, permits and site boundaries are too complex for one summary; open the relevant source for those cases. Cycling restrictions are stated directly on page 4.

Netherlands / Belgium / Ireland

Amsterdam centre: max 15; above 4 needs exemption; 08:00-22:00; no speakers/megaphones/shouting. **Bruges:** max 20 excluding guide; no amplification; organiser/guide authorisation; no commentary stops in restricted streets/quiet zones. **Ireland:** intrusive repeated noise can trigger complaints; avoid residential stops.

West / Alpine / microstates

Portugal: police may order neighbourhood noise stopped immediately 23:00-07:00, or set a deadline in daytime. **Austria:** no universal absolute 22:00-06:00 window; disturbing noise can offend anytime. **Geneva, Switzerland:** avoidable noise restricted 21:00-07:00 and Sundays/holidays. **Luxembourg, Liechtenstein, Andorra, Monaco, San Marino:** keep lanes/entrances clear and avoid amplification (practice).

Nordic / Baltic

Denmark Nature Agency land: noisy/qualifying organised activity needs permission, apply 4 weeks ahead. **Sweden:** public access cannot cause substantial disturbance/damage. **Finland, Norway, Iceland; Estonia, Latvia, Lithuania:** use small quiet stops, protect nature, avoid homes (practice). Estonia prohibits significant public-place disturbance anytime. Iceland's Hornstrandir caps groups at 30 west/15 east, with stated exceptions.

Central / East

Czechia, Slovenia: night quiet generally 22:00-06:00. **Poland:** disturbing peace can offend by day too. **Romania residential vicinity:** 22:00-08:00 and 13:00-14:00. **Bulgaria specified zones:** outdoor amplification prohibited 14:00-16:00 and 23:00-08:00. **Hungary/Slovakia:** avoid amplified residential commentary (practice).

South / Southeast

Greece: Apr-Sep quiet 15:00-17:30/23:00-07:00; Oct-Mar 15:30-17:30/22:00-07:30. **Dubrovnik historic core, Croatia:** groups above 20 need audio devices. **Malta, Cyprus, Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia, Serbia:** quiet small groups and agreed venue audio (practice).

East / transcontinental

Moldova, Ukraine, Belarus, Russia, Türkiye, Georgia, Armenia, Azerbaijan, Kazakhstan: settle current entry/security and route access before committing; use quiet, unamplified briefings (practice). Inclusion is coverage, not a travel recommendation.

No Europe-wide tour-guide decibel allowance is asserted. Radio legality depends on the exact version, frequency and power; use Ofcom for UK permissions and country-specific confirmation elsewhere. Detailed maps, exemptions, protected-site permits and current security restrictions are too extensive for this short guide: open the cited source when they affect your route.
